

FALCON INSIGHT - EDR MADE EASY

Traditional endpoint security tools have blind spots, making them unable to see and stop advanced threats. CrowdStrike Falcon Insight endpoint detection and response (EDR) solves this by delivering complete endpoint visibility across your organization.

Falcon Insight continuously monitors all endpoint activity and analyzes the data in real time to automatically identify threat activity, enabling it to both detect and prevent advanced threats as they happen. All endpoint activity is also streamed to the CrowdStrike Falcon platform so that security teams can rapidly investigate incidents, respond to alerts and proactively hunt for new threats.

CrowdStrike is ranked highest in Lean Forward Type A use case in 2021 Gartner Critical Capabilities for Endpoint Protection Platforms.

KEY PRODUCT CAPABILITIES

- Automatically detect attacker activities
- Unravel entire attacks on just one screen
- Accelerate Investigation workflow with MITRE ATTACK
- Gain Context and intelligence & respond decisively
- See the big picture in real time
- Capture critical details for threat hunting and forensic investigations
- Understand endpoint security posture
- Experience no impact on the endpoint
- See the big picture in real time
